Experience

@UBTConsults

// Lead Developer

JAN 2022 - CURRENT

Lead the development and maintenance of apps for government projects in Nigeria which currently has thousands of active users and counting.

- Built several apis to interface with a mobile app and several microservices.
- Created several vue apps as microservice.
- Assisted in maintaining a good relationship with clients.
- Maintained 2 Laravel apps with thousands of users.
- Did code reviews for interns and handled code deployments.
- Built 2 PWAs that utilize local stores to serve as an offline mode for using apps in remote locations in Nigeria.
- Deployed new features to a laravel app in production.

// Fullstack Engineer

NOV 2020 - JAN 2022

Developed new features including a virtual classroom feature using apis from zoom during the covid-19 lockdown and paystack

- Built a virtual classroom feature during the Covid-19 lockdown using zoom
- Built a payment webapp using paystack apis for a high profile organization in Nigeria.
- Designed prototypes on Figma for new features.
- Built apis for a mobile to interface with a virtual classroom feature.
- Created figma prototypes for mobile and desktop for a brand new vuetify themed laravel app and also did demos using the prototypes.
- Created s3 buckets to handle file uploads.
- Slowly transitioned company software from jquery to Vue.js.
- Designed company themed markdown email receipts.
- Handled initial development stages of a collage management vue-laravel app.

// Junior Developer

OCT 2020 - NOV 2020

I Worked in a small team of 4 to reengineer and maintain company software, I worked mostly on the backend to resolve bugs and worked on prototypes on figma.

- Created a color palette for company software.
- Debugged jquery code
- Setup mailtrap to test the mailing system in web apps.
- Designed emails using markdown and laravel
